## EXTRACURRICULAR

MEMBER | 2020 - PRESENT
Software Development and Programming Education Group at Tecnológico de Monterrey

## PROJECTS

### BOOKING SYSTEM SIMULATOR
DECEMBER 2019

CLI simulator of a flight booking system for a university project.
Project made with C++

### STREAMING SERVICE MODELING
JANUARY 2021

CLI program simulating a movie and series streaming service with the object-oriented paradigm for a Coursera course project.
Project made with Java

### FEEDBACK CHANNEL
APRIL 2021

Web platform for the company Amdocs to track complaints and suggestions within the company, made by a team of 5 people, where I worked mainly in UI/UX design and frontend development.
Project made with React JS, NodeJS and MongoDB

### HITEC WEB
JULY 2021

Official site of the event for the new students of Tecnológico de Monterrey, where a questionnaire is answered and a student group is suggested according to the answers, made with a team, where I worked on the UI/UX design and development.
Project made with React JS and Firebase

### MY PORTFOLIO WEBSITE
JULY 2021

I designed and developed my web portfolio to show who I am, what I do, the projects I have done and the tools I have used for them.
Project made with HTML / CSS
